No damage for the CFRP

Reliable and reduce the time for the salvage work.

Pull out the sleeve by dig the special tap into the inside.

However, it does not make sense to deform the sleeve with a special tap.

This tool can withdraw the sleeve without damaging the CFRP without deforming the 0.2 mm thick sleeve.

(Special tap does not deform sleeve)

Collar cutter

Special Tap

Salvage

Corresponds also to a narrow space where the salvage MINI can not be used.
